Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. This data represents past performance and investors should understand that investment returns and principal values fluctuate, so that when you redeem your investment it may be worth more or less than its original cost. Current month-end performance data, which may be higher or lower than the performance data quoted, may be obtained at fpa.com or by calling toll-free, 1-800-982-4372. As of its most recent prospectus, the Fund's total expense ratio is 0.59% and net expense ratio is 0.45%.

Periods greater than one year are annualized. FPA New Income Fund – Institutional Class ("Fund" or "FPNIX") performance is calculated on a total return basis which includes reinvestment of all distributions and is net of all fees and expenses. Fund returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares, which would lower these figures. Comparison to any index is for illustrative purposes only. The Fund does not include outperformance of any index or benchmark in its investment objectives. An investor cannot invest directly in an index.

The Total Annual Fund Operating Expenses before reimbursement is 0.59% for the Institutional Class (FPNIX) and 0.79% for the Investor Class (FPNRX) (as of the most recent prospectus). The Fund's investment adviser has contractually agreed to reimburse the Fund for Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage fees and commissions payable by the Fund in connection with the purchase or sale of portfolio securities, and extraordinary expenses, including litigation expenses not incurred in the Fund's ordinary course of business) in excess of 0.45% of the average daily net assets of the Institutional Class shares of the Fund through July 27, 2024, and in excess of 0.454% of the average daily net assets of the Institutional Class shares of the Fund from July 28, 2024 through April 30, 2025, and in excess of 0.55% of the average daily net assets of the Investor Class shares of the Fund from inception through July 27, 2024, and in excess of 0.554% of the average daily net assets of the Investor Class shares of the Fund from July 28, 2024 through April 30, 2025. This agreement may only be terminated earlier by the Fund's Board of Trustees (the "Board") or upon termination of the Advisory Agreement.

Effective July 28, 2023, FPA New Income, Inc. was reorganized into the FPA Funds Trust and its new name is FPA New Income Fund. On January 10, 2024, the FPA Funds Trust was renamed to Investment Managers Series Trust III. Effective April 30, 2024, the current single class of shares of the Fund was renamed the Institutional Class shares and has the same ticker symbol (FPNIX). All data herein is representative of the Institutional Class shares.

You should consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. The Prospectus details the Fund's objective and policies, charges, and other matters of interest to a prospective investor. Please read the Prospectus carefully before investing. The Prospectus may be obtained by visiting the website at fpa.com, by email at crm@fpa.com, toll-free by calling 1-800-982-4372 or by contacting the Fund in writing.

Please see important disclosures at the end of this commentary.

Important Disclosures

This Commentary is for informational and discussion purposes only and does not constitute, and should not be construed as, an offer or solicitation for the purchase or sale of any securities, products or services discussed, and neither does it provide investment advice. Any such offer or solicitation shall only be made pursuant to the Fund's Prospectus, which supersedes the information contained herein in its entirety.

The views expressed herein and any forward-looking statements are as of the date of the publication and are those of the portfolio management team. Future events or results may vary significantly from those expressed and are subject to change at any time in response to changing circumstances and industry developments. This information and data has been prepared from sources believed reliable, but the accuracy and completeness of the information cannot be guaranteed and is not a complete summary or statement of all available data. You should not construe the contents of this document as legal, tax, accounting, investment or other advice or recommendations.

Abhijeet Patwardhan has been portfolio manager for the Fund since November 2015. Thomas Atteberry managed/co-managed the Fund from November 2004 through June 2022. Effective July 1, 2022, Mr. Atteberry transitioned to a Senior Advisory role. There were no material changes to the investment process due to this transition. Effective September 30, 2023, Mr. Atteberry no longer acts as a Senior Advisor to the investment team, but he remains as Senior Advisor to FPA.

Effective July 28, 2023, FPA New Income, Inc. was reorganized into the FPA Funds Trust and its new name is FPA New Income Fund. There was no change in its investment objective, investment strategy or fundamental investment policies. FPA continues to be the adviser to the Fund. For more information, please refer to the announcement on FPA's website at: <https://fpa.com/news-special-commentaries/fund-announcements/2023/06/26/fpa-announces-fund-reorganizations>. Effective January 10, 2024, the FPA Funds Trust was renamed to the Investment Managers Series Trust III.

Portfolio composition will change due to ongoing management of the Fund. References to individual securities or sectors are for informational purposes only and should not be construed as recommendations by the Fund, the portfolio manager, the Adviser, or the distributor. It should not be assumed that future investments will be profitable or will equal the performance of the security or sector examples discussed. The portfolio holdings as of the most recent quarter-end may be obtained at fpa.com.

The statements made herein may be forward-looking and/or based on current expectations, projections, and/or information currently available. Actual results may differ from those anticipated. The portfolio manager and/or FPA cannot assure future results and disclaims any obligation to update or alter any statistical data and/or references thereto, as well as any forward-looking statements, whether as a result of new information, future events, or otherwise. Such statements may or may not be accurate over the long-term.

Investments, including investments in mutual funds, carry risks and investors may lose principal value. Capital markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The Fund may purchase foreign securities, including depository receipts, which are subject to interest rate, currency exchange rate, economic and political risks; these risks may be elevated when investing in emerging markets. Foreign investments, especially those of companies in emerging markets, can be riskier, less liquid, harder to value, and more volatile than investments in the United States. The securities of smaller, less well-known companies can be more volatile than those of larger companies.

The return of principal in a bond fund is not guaranteed. Bond funds have the same issuer, interest rate, inflation and credit risks that are associated with underlying bonds owned by the Fund. Lower rated bonds, convertible securities and other types of debt obligations involve greater risks than higher rated bonds.

Interest rate risk is the risk that when interest rates go up, the value of fixed income instruments, such as bonds, typically go down and investors may lose principal value. Credit risk is the risk of loss of principal due to the issuer's failure to repay a loan. Generally, the lower the quality rating of a fixed income instrument, the greater the risk that the issuer will fail to pay interest fully and return principal in a timely manner. If an issuer defaults, the fixed income instrument may lose some or all of its value.

Mortgage securities and collateralized mortgage obligations (CMOs) are subject to prepayment risk and the risk of default on the underlying mortgages or other assets; such derivatives may increase volatility. Convertible securities are generally not investment grade and are subject to greater credit risk than higher-rated investments. High yield securities can be volatile and subject to much higher instances of default.

Collateralized debt obligations ("CDOs"), which include collateralized loan obligations ("CLOs"), collateralized bond obligations ("CBOs"), and other similarly structured securities, carry additional risks in addition to interest rate risk and default risk. This includes, but is not limited to: (i) distributions from the underlying collateral may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; and (iii) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results. Investments in CDOs are also more difficult to value than other investments.

Value style investing presents the risk that the holdings or securities may never reach their full market value because the market fails to recognize what the portfolio management team considers the true business value or because the portfolio management team has misjudged those values. In addition, value style investing may fall out of favor and underperform growth or other styles of investing during given periods.

The ratings agencies that provide ratings are the Nationally Recognized Statistical Ratings Organizations (NRSROs) DBRS, Inc., Fitch Ratings, Inc., Kroll Bond Rating Agency, Inc., Moody's Investors Service, Inc., and S&P Global Ratings. Credit ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings of BB and below are lower-rated securities (junk bonds). High-yielding, non-investment grade bonds (junk bonds) involve higher risks than investment grade bonds. Bonds with credit ratings of CCC or below have higher default risk.

Please refer to the Fund's Prospectus for a complete overview of the primary risks associated with the Fund.

The Fund is not authorized for distribution unless preceded or accompanied by a current prospectus. The prospectus can be accessed at: <https://fpa.com/request-funds-literature>.

Important Disclosures for Hypothetical Stress-Tested Results

The hypothetical and estimated data provided herein is for illustrative and informational purposes only. No representation is being made that Fund or the securities used for the simulation will or is likely to achieve profits, losses, or results similar to those shown. Hypothetical and estimated results do not reflect trading in actual accounts, and do not reflect the impact that economic, market or other factors may have on the management of the account.

The hypothetical and estimated results as set forth in this commentary do not represent actual results; actual results may significantly differ from the theoretical data being presented. Hypothetical/estimated results have certain inherent limitations. Hypothetical models theoretically may be changed from time to time to obtain more favorable results. There may be sharp differences between simulated or estimated results and the actual results subsequently achieved by any particular security, account, product or strategy. In addition, simulated/estimated results cannot account for the impact of certain market risks such as a lack of liquidity or default risk. There are numerous other factors related to the markets in general or the implementation of any specific strategy which cannot be fully accounted for in the preparation of simulated or estimated results, all of which can adversely affect actual results.

A client's individual portfolio results may vary from any hypothetical or estimated results because of the timing of trades, deposits and withdrawals, the impact of management fees and taxes, market fluctuations, trading costs, cash flows, custodian fees, among other factors. Hypothetical results are not meant to be construed as a prediction of the future return of the Fund. **Past performance is no guarantee, nor is it indicative, of future results.**

Index / Category Definitions

Comparison to any index is for illustrative purposes only and should not be relied upon as a fully accurate measure of comparison. The Fund will be less diversified than the indices noted herein and may hold non-index securities or securities that are not comparable to those contained in an index. Indices will hold positions that are not within the Fund's investment strategy. Indices are unmanaged, do not reflect any commissions, fees or expenses which would be incurred by an investor purchasing the underlying securities. The Fund does not include outperformance of any index or benchmark in its investment objectives. Investors cannot invest directly in an index.

Bloomberg U.S. Aggregate Bond Index provides a measure of the performance of the U.S. investment grade bonds market, which includes investment grade U.S. Government bonds, investment grade corporate bonds, mortgage pass-through securities and asset-backed securities that are publicly offered for sale in the United States. The securities in the Index must have at least 1 year remaining in maturity. In addition, the securities must be denominated in U.S. dollars and must be fixed rate, nonconvertible, and taxable.

Bloomberg U.S. Aggregate 1-3 Year Bond Index provides a measure of the performance of the U.S. investment grade bonds market, which includes investment grade U.S. Government bonds, investment grade corporate bonds, mortgage pass-through securities and asset-backed securities that are publicly offered for sale in the United States. The securities in the Index must have a remaining maturity of 1 to 3 years. In addition, the securities must be denominated in U.S. dollars and must be fixed rate, nonconvertible, and taxable.

Bloomberg U.S. Corporate High Yield Index measures the market of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds. **Bloomberg U.S. Corporate High Yield BB ex Energy Index** measures the market of USD-denominated, non-investment grade, fixed-rate, taxable BB-rated corporate bonds excluding energy sector. **Bloomberg U.S. Corporate High Yield B ex Energy Index** measures the market of USD-denominated, non-investment grade, fixed-rate, taxable B-rated corporate bonds excluding energy sector.

Bloomberg U.S. Investment Grade Corporate Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility, and financial issuers.

The **Consumer Price Index (CPI)** is an unmanaged index representing the rate of the inflation of U.S. consumer prices as determined by the U.S. Department of Labor Statistics. There can be no guarantee that the CPI will reflect the exact level of inflation at any given time. This index reflects non-seasonally adjusted returns.

CPI + 100 bps is the measure of the CPI plus an additional 100 basis points.

Morningstar Short-term Bond Category portfolios invest primarily in corporate and other investment-grade U.S. fixed-income issues and typically have durations of 1.0 to 3.5 years. These portfolios are attractive to fairly conservative investors, because they are less sensitive to interest rates than portfolios with longer durations. Morningstar calculates monthly breakpoints using the effective duration of the Morningstar Core Bond Index in determining duration assignment. Short-term is defined as 25% to 75% of the three-year average effective duration of the Morningstar Core Bond Index. As of March 31, 2024, there were 581 funds in this category.

Other Definitions

ABS (Asset Backed Securities): financial securities backed by a loan, lease or receivables against assets other than real estate and mortgage-backed securities.

Basis Point (bps) is equal to one hundredth of one percent, or 0.01%. 100 basis points = 1%.

CLO (Collateralized Loan Obligation): is a single security backed by a pool of debt.

CMBS (Commercial Mortgage Backed Security): a mortgage-backed security backed by commercial mortgages rather than residential mortgages.

Convexity is the curvature in the relationship between bond prices and interest rates. It reflects the rate at which the duration of a bond changes as interest rates change.

Core duration bonds (also known as core bonds) refer to bonds similar in duration to Bloomberg U.S. Aggregate Bond Index.

Coupon or coupon payment is the annual interest rate paid on a bond, expressed as a percentage of the face value and paid from issue date until maturity.

Corporate Holdings include bank debt, corporate bonds and common stock.

Effective Duration (years) is the duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change.

Mark-to-market is a method of recording the price or value of a security, portfolio, or account to reflect the current market value rather than book value.

A bond **premium** occurs when the price of the bond has increased in the secondary market. A bond might trade at a premium because its interest rate is higher than current rates in the market.

RMBS (Residential Mortgage Backed Securities): mortgage-backed securities backed by residential mortgages.

Stripped Mortgage-Backed Securities: a trust comprised of mortgage-backed securities which are split into principal-only strips and interest-only strips.

Weighted Average Life (years) is the average length of time that each dollar of unpaid principal on a loan, a mortgage or an amortizing bond remains outstanding. It is also referred to as "Average Life" or "Weighted Average Maturity."

Yield-to-Maturity (YTM) is the expected rate of return anticipated on a bond if held until it matures. YTM is considered a long-term bond yield expressed as an annual rate. The YTM calculation takes into account the bond's current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupon payments are reinvested at the same rate as the bond's current yield.

Portfolio Holding Disclosures

You should consider the the FPA New Income Fund's ("Fund") investment objectives, risks, and charges and expenses carefully before you invest. The Prospectus details the Fund's objective and policies, sales charges, and other matters of interest to the prospective investor. Please read the Prospectus carefully before investing. The Prospectus may be obtained by visiting the website at fpa.com, by email at crm@fpa.com, toll-free by calling 1-800-982-4372 or by contacting the Fund in writing.

The Fund's holdings data contained herein is subject to change. Portfolio composition will change due to ongoing management of the Fund. References to individual securities are for informational purposes only and should not be construed as recommendations by the Fund, the portfolio managers, FPA, or the distributor.

Investments, including investments in mutual funds, carry risks and investors may lose principal value. Capital markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The Fund may purchase foreign securities, including American Depository Receipts (ADRs) and other depository receipts, which are subject to interest rate, currency exchange rate, economic and political risks; this may be enhanced when investing in emerging markets. Securities of smaller, less well-known companies involve greater risks and they can fluctuate in price more than larger company securities. You risk paying more for a security than you received from its sale.

The return of principal in a bond investment is not guaranteed. Bonds have issuer, interest rate, inflation and credit risks. Interest rate risk is when interest rates go up, the value of fixed income securities, such as bonds, typically go down and investors may lose principal value. Credit risk is the risk of loss of principle due to the issuer's failure to repay a loan. Generally, the lower the quality rating of a security, the greater the risk that the issuer will fail to pay interest fully and return principal in a timely manner. If an issuer defaults the security may lose some or all its value. Lower rated bonds, callable bonds and other types of debt obligations involve greater risks. Mortgage securities, collateralized mortgage obligations (CMOs), and asset backed securities are subject to prepayment risk and the risk of default on the underlying mortgages or other assets; such derivatives may increase volatility. These securities can also be highly sensitive to changes in interest rates. Convertible securities are generally not investment grade and are subject to greater credit risk than higher-rated investments. High yield securities can be volatile and subject to much higher instances of default. The Fund may experience increased costs, losses and delays in liquidating underlying securities should the seller of a repurchase agreement declare bankruptcy or default.

The ratings agencies that provide ratings are Standard and Poor's ("S&P"), Fitch, Moody's, and any other nationally recognized statistical rating organization ("NRSO"). Credit ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings of BB and below are lowerrated securities (junk bonds). High-yielding, non-investment grade bonds (junk bonds) involve higher risks than investment grade bonds. Bonds with credit ratings of CCC/Caa or below have high default risk.

Collateralized debt obligations ("CDOs"), which include collateralized loan obligations ("CLOs"), collateralized bond obligations ("CBOs"), and other similarly structured securities, carry additional risks in addition to interest rate risk and default risk. This includes, but is not limited to: (i) distributions from the underlying collateral may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; and (iii) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results. Investments in CDOs are also more difficult to value than other investments.

Value style investing presents the risk that the holdings or securities may never reach their full market value because the market fails to recognize what the portfolio management team considers the true business value or because the portfolio management team has misjudged those values. In addition, value style investing may fall out of favor and underperform growth or other styles of investing during given periods.

Please refer to the Fund's Prospectus for a complete overview of the primary risks associated with the Fund.

The Fund is distributed by UMB Distribution Services, LLC, 235 W. Galena Street, Milwaukee, WI, 53212. FPA and UMB are not affiliated.
